High School Diploma

## TECH SKILLS

---

HTML, CSS, SCSS, Tailwindcss, Typescript, Bootstrap Javascript, React, Redux, Redux Toolkit,

## EXPERIENCE

---

### VERTEX INOVATORS ( April 2023 – October 2023)

- developed a **Front-end, Admin Dashboard** web app.
- Front-end: React, React hooks, Redux, Scss, Bootstrap.
- Using this site users can register, login, write a new submission for the journal, Admins can Create/Update/Delete users, submissions, news, etc.
- I also created a Protected Routes for the users, an Api calls from the server for registration, login, news posts, submissions, users with roles, admin/user dashboard

## Personal Apps

### Snapshot App

dynamic React-based Image Gallery app that delivers an engaging user experience with the following features: Random Image Display: Presenting users with a captivating display of random images on the interface. Filter Functionality: Incorporating four filter options for users to seamlessly categorize and explore images based on specific criteria. Search Capability: Implementing a responsive search input, empowering users to discover images by entering custom keywords.

### Ecommerce App

e-commerce application with a focus on delivering a seamless shopping experience and secure checkout process: Product Management: Developed a gender-filtered catalog featuring 12 products for efficient product exploration. Shopping Cart Functionality: Enabled users to dynamically manage their cart, adjusting quantities, removing items, and reviewing selections. Secure Checkout: Implemented a secure checkout process, integrating a card information form for accurate and protected transactions. Purchase Flow: Streamlined the purchase process, ensuring successful acquisition upon correct card details entry. Error Handling: Incorporated effective error handling in the card information form, restricting purchases until all details are accurately provided.
